Rely on us for...

Henry Schein Medical... Rely On Us

Henry Schein, Inc. is the worlds largest provider of health care products and services to office-based practitioners with over 82 years of experience. A Fortune 500® Company and a member of the NASDAQ 100® Index, Henry Schein employs nearly 17,000 Team Schein Members and serves more than 800,000 customers with operations or affiliates in 28 countries.

Henry Schein Medical, the Companys Medical Division, services some of the largest health care organizations in the country and is dedicated to providing customers with expert guidance and turnkey solutions that enable the best quality patient care along with increased efficiency and productivity. Our customers rely on us to help them operate better businesses and attain their goals in a rapidly changing health care landscape.

What We Do:

As a **network of trusted advisors**, our team delivers on this commitment by providing integrated technology solutions, including unsurpassed supply-chain and e-commerce systems, electronic health records, and practice management software. We also provide a broad range of financial services and other business solutions that focus on improving the bottom line.

Our comprehensive product offerings include:

- Medical & Surgical Supplies
- Equipment
- Henry Schein Brand Products
- Diagnostic Tests & Lab
- Pharmaceuticals & Vaccines
- Office Supplies & More...

Price Integrity:

We are highly competitive with our pricing and strive to maintain prices through the development of purchasing plans, GPO programs and by delivering the best value for your practice.

Guaranteed Fast Delivery:

Orders received by 5:00 PM local time are shipped the same day. Your products arrive within 24–48 hours in most areas.

HENRY SCHEIN® SolutionsHub

A complete array of services from Technology Solutions to Practice Marketing is available to help you achieve your practice goals. See the special section at the end of this flyer.

DID YOU KNOW?

Acne is one of the most common skin diseases afflicting 85% of U.S. teens between the ages of 12 and 24; and increasingly adult acne affects 25% of male and 50% of females in their 20s, 30s, and beyond. Many common topical medications (e.g., salicylic acids, benzoyl peroxides, etc.) come with undesirable side effects and oral antibiotics may promote bacterial resistance. For an exciting new professional acne management product called Acnizil, visit us at: **www.henryschein.com/acnizil**

BRAND PROMISE

HENRY SCHEIN®
ONE STEP PRO+ MONONUCLEOSIS TEST KIT

- CLIA waived for whole blood
- No age restrictions
- Measures heterophile antibodies in whole blood, serum and plasma
- Uses best technology of bovine derivatives, which eliminate cross reactivity
- Room temperature or refrigerated storage
- Two internal controls exist to avoid additional cost and ensure good laboratory practice
- Only 25 µL blood needed
- **Made in the USA**

Mono Test Kit
(112-5547) 20/box **$59.99**
Contains: 20 test devices, 1 developer solution, 1 negative control, 1 positive control, 40 sample transfer pipettes (20 for serum/plasma & 20 for whole blood), 1 procedure card & 1 package insert.
CPT® Codes: 86308QW† (Whole Blood) / 86308† (Serum/Plasma)

HENRY SCHEIN®
ONESTEP+ INFLUENZA A & B TEST

This test provides a simple, rapid method to aid in the differential diagnosis of influenza A & B using nasal swab specimens.

- CLIA waived
- 10-minute results
- Sensitivity (A/B): 93.8%/77.4%
- Specificity (A/B): 95.8%/98%
- **Made in the USA**

#1126219, Influenza A & B Test

CPT® Codes: 87804QW† (Influenza A); 87804-59† (Influenza B)

HENRY SCHEIN®
ONESTEP+ MONO CASSETTE TEST

A rapid chromatographic-immunoassay for the qualitative detection of infectious mononucleosis in whole blood, serum, or plasma.

- CLIA waived
- Finger stick or collection tube
- Room-temperature storage
- Includes controls

Complete Kit
(900-4070) 20/box
Contains: 20 pouched test devices with disposable sample droppers; disposable, heparinized capillary tubes with dispensing bulb; 1 of each control (positive & negative); 1 sample buffer; 1 procedure card & 1 package insert.
CPT® Code: 86308QW†

HENRY SCHEIN®
ONESTEP+ STREP A TEST STRIPS

- CLIA-waived
- Room-temperature storage
- Canister packaging for ease of multiple testing
- Walk-away procedure

(107-4050) 25/box
CPT® Code: 87880QW†

HENRY SCHEIN®
ONESTEP PRO+ STREP A CASSETTE KIT

- CLIA-waived
- Easy-to-use flip design; all-in-one extraction, incubation, and test
- Results in 5–10 minutes
- Sensitivity of 96.2% and specificity of 98.7%
- External negative and positive controls included
- **Made in the USA**

(900-7570).....25 tests/kit
CPT® Code: 87880QW†

OSOM® Influenza A & B Tests

In vitro diagnostic test for the qualitative detection of influenza A and B antigens.

- Differentiates between influenza A and B
- Sensitivity (A/B): 73.8%/60%
- Specificity (A/B): 96.4%/96.4%
- Easy to read: 3 distinct lines
- Nasal swab specimens
- Less than 1 minute hands-on time; results in 10 minutes
- Room-temperature storage
- Moderately complex
- 2 extra test sticks included for external QC testing
- **Made in the USA**

BD

BD Veritor™ System

- Proven performance vs. PCR
- Unique Adaptive Read Technology provides reproducibility you can count on
- Easy-to-read digital display eliminates subjective interpretation and delivers the "Trusted Answer"
- Convenient workflow with minimal hands-on time

#256055, BD Veritor™ System Reader
A rapid chromatographic immunoassay for use with symptomatic patients. This CLIA-waived kit is to be used with the BD Veritor System Reader to test nasal and nasopharyngeal swab samples that are freshly collected, processed and dispensed directly onto an assay test device.
#256055, BD Veritor™ System Reader
(992-0003) .....ea

#256045, CLIA-waived BD Veritor™ System Flu A+B Kit
(992-0002).....30 tests/pkg
CPT® Codes: Influenza A: 87804QW† / Influenza B: 87804-59†; Using the Objective and Differentiated Reader System: 87999†

#256042, BD Veritor™ System RSV Kit
The BD Veritor™ System RSV Kit is a chromatographic immunoassay with an instrumented read for the direct and qualitative detection of RSV fusion protein from nasopharyngeal wash, aspirate and swab in transport media samples from patients suspected of having a viral respiratory infection. This test is intended for in vitro diagnostic use to aid in the diagnosis of RSV infections in infants and pediatric patients under the age of 20 years. Moderately complex.

#256042, BD Veritor™ System RSV Kit
(992-0005) 30/box
CPT® Code: 87807†

BD

BD Veritor System RSV CLIA Waived Kit
The first CLIA-waived RSV test referenced against a higher sensitivity standard than culture. Test device is ready to insert into reader 10 minutes after sample is added. The same sample processed for RSV can also be used for flu A+B. Digital results displayed in 10 seconds.
#256038
(121-7553) 30/box
CPT® Code: 87807QW†

BD

BD Veritor System Group A Strep Test
The first CLIA-waived digital immunoassay (DIA) for the rapid detection of Group A strep (GAS) with an instrumented result. Test device is ready to insert into reader 5 minutes after sample is added. Once the test device is inserted in the reader, an objective, digital test result is displayed in 10 seconds.
#256040
(992-0006) 30/box
CPT® Code: 87880QW†

small package
BIG REVOLUTION

It will change the way you view rapid testing...

- **Proven Performance vs PCR —** PCR is currently the highest sensitivity standard available
- **Reproducibility You Can Count On —** Unique Adaptive Read Technology helps reduce false-positive results

- **Results You Can Trust—** Easy-to-read digital display eliminates subjective interpretation
- **Convenient Workflow—** Testing requires minimal hands-on time

Sofia®

Rapid Testing . . . Redefined.

Sofia . . . by Quidel, is redefining lateral flow rapid testing, utilizing advanced immunofluorescence technology with next generation rapid immunoassays. You no longer have to choose between accurate results and fast turnaround time.

Sofia features a growing menu of test options combined with:

- Enhanced assay sensitivity
- Automated and objective results to eliminate operator-to-operator variability
- Flexible work flow options
- Intuitive easy-to-use interface, customizable settings, barcode technology and LIS connectivity

Answers for life.

SIEMENS

Alere™ Cholestech LDX® System
Complete Lipid Profile, Glucose

Lab-accurate lipid profile, glucose, ALT, AST, and hs-CRP results in about 5 minutes* from a simple fingerstick. Allows provider to get results while patient is still in office—provider can counsel and intervene face-to-face. This improves patient compliance and increases control and management of heart disease and diabetes. Reimbursable by Medicare and most private payers.

- CLIA waived**
- Procedure saves time and enhances productivity
- Small, tough, and portable
- Eliminates anxiety of venipuncture; requires only a fingerstick
- On-the-spot adjustment of therapy and improved patient compliance
- Accuracy comparable to laboratory tests
- Saves time: fewer follow-up visits required
- Enhances compliance through teachable moments between healthcare providers and patients

#10-959, Analyzer
(738-2917) .....ea

CoaguChek XS® System

PT/INR Monitoring Solution

The next generation in point-of-care prothrombotin (PT) and international normalized ratio (INR) testing, this new system uses exclusive smart technology to help ensure accurate results and offers the flexibility and control that health care professionals need to confidently manage a wide range of anticoagulated patients. It is the only system to perform onboard quality control and determine patient results in a single-test chamber.

- CLIA waived
- Neutralizes therapeutic levels of heparin and LMWH
- INR corrected for hematocrit within specified range; manage a broad array of patients with a single device
- Small sample size (10 µL) for easy dosing
- Strip allows dosing from either top or side for simple blood application
- Small, battery-powered, handheld meter for portability and efficiency
- Onboard controls; no external QC necessary
- Auto-on with strip insertion and auto-off capabilities
- 18-month strip shelf life; no refrigeration needed
- **Made in the USA**

FREND™ System
This quantitative immunoassay analyzer utilizes disposable kits to provide in-vitro diagnostic results for TPSA. The accurate, automated testing procedure—a simple, 3-step operation—provides results in 4 minutes. No need to batch your sample—run when you are ready. This fully automated device is equipped with an easy-to-use touch-screen interface. The FREND™ is compact and lightweight, allowing for portability.

- With electronic code-chip calibration, there's no need to run liquid calibrators
- Daily electronic system QC control takes only 1½ minutes
- Controls run a minimum of once a month

(455-0011) .....ea

PSAPlus Immunoassay Test
The PSA Plus cartridge is designed for insertion into the FREND™ System. It measures the level of prostate-specific antigen (TPSA) to aid in the diagnosis and to monitor (or manage) patients with prostate cancer. Provides fast and accurate quantitative in-vitro diagnostic of the protein in human serum or plasma based on the lab-on-a-chip technology.

- Test can be used with either plasma or serum samples
- Maximum reaction time: 4 minutes

PSA Plus Immunoassay Test

Abbott Point of Care

i-STAT® Handheld System

This fully automated system provides accurate results in minutes for a wide range of tests using just 2 or 3 drops of blood.

- Easy to use: Insert blood on the cartridge, insert cartridge into the analyzer and view the results in minutes
- Weighs 18 oz, making it portable
- Test results are uploaded automatically when placed in the downloader

#04J60-20, iSTAT Handheld System
(111-3324) .....ea
Contains: analyzer, printer, simulator, downloader & manual.

ABX Pentra 400 Analyzer Clinical Chemistry System

VITAMIN D & DRUGS OF ABUSE TESTING NOW AVAILABLE!

HORIBA Medical

A compact, benchtop, clinical chemistry analyzer. Its autonomy and continuous loading provide enhanced productivity in a user-friendly environment. This very precise optical system meets the requirements of highly accurate photometric measurement. An extensive panel of liquid reagents simplifies workflow. Horiba presents a range of ready-to-use reagents in a single format.

- Up to 420 tests per hour with the ISE module
- 55 on-board assays with backup availability
- Save valuable time: control all of your operations from the main screen (system, reagent, and sample status), and easily upload target values for calibrators and controls
- Secure data management: Westgard multirule QC procedures with up to 3 default controls, full QC program stores up to 12 months of control history, Levey-Jennings, and statistics
- Conduct high-quality analysis: single-use reaction cuvette performs sensitive tests and all latex assays, high-performance mixer design mixes in minimal time without contaminating, and test-sequence setting program features an incompatibility function
- Control cost: optimized number of tests per cassette and limited calibrations

#P4000000NUA1
(690-0247) .....ea

Advia Centaur® XP Immunoassay System

This high-performance system has more onboard reagents and dedicated STAT capabilities to maximize productivity, regardless of volume or types of tests. Offers "always ready" continuous operation without interruption.

System offers:

- High throughput of up to 240 tests per hour
- Intuitive software for ease of operation
- STAT port guarantees priority sampling at any time
- Data archive reduces administrative tasks
- Extensive menu with 30 onboard reagents
- **Powerful productivity:**
- Data archive feature reduces time for administrative tasks
- Universal sample rack design eliminates manual tasks
- **Excellent patient care:**
- Automatic dilution, repeat, and reflex testing
- Smart Algorithm Software automatically repeats and confirms reactive testing
- **Flexible solutions:**
- Connects to Siemens Aptio™ Automation, Advia® Automation, StreamLAB® Automation, and VersaCell® Solutions
- Siemens Remote Service (SRS) proactively maintains Siemens systems

#078-A011-03

SIEMENS

Market Leader in POL Chemistry

Based on proven instrument technology, the ACE Axcel Clinical Chemistry System provides reliable, accurate results in a small footprint. With 12 consecutive years of award-winning customer excellence, it's no surprise that Alfa Wassermann is #1 in chemistry analyzers for the Physician Office Laboratory.

The ACE Axcel™ Clinical Chemistry System

- Run between 15 CMP/Lipids to 50 CMP/Lipids per day
- Ready-to-use liquid reagents
- No external water or waste drain required
- Closed tube sampling improves safety and workflow

ALFA WASSERMANN
Diagnostic Technologies, LLC
Reliable. Accurate. Results.

Looking to meet connectivity needs? **The Apex Laboratory Information System (LIS)** offers adaptable, affordable connectivity for the physician office lab.

Ask your Henry Schein representative about Alfa Wassermann's LIS offering and chemistry trade-in promo!

Sinsational Smile complete system

Includes: Accelerator Light, 24 treatment trays and 24 Home Care Pens, Item #334-0038

Pays for itself in only 17 treatments at $129 per treatment!

Sinsational Smile
A smile so bright, it's sinful.

Sinsational Smile Is the Most Asked About Cosmetic Whitening Procedure in the Country

Incorporating this 20-minute treatment keeps patients returning to your practice for ALL of their cosmetic and aesthetic surgery needs. Practices utilize this service to:

- ➢ Reward loyal patients for referrals and repeat business
- ➢ Promote seasonal campaigns and special events
- ➢ Upsell and bundle of procedures and services
- ➢ Optimize wait times before starting procedures
- ➢ ***GENERATE MORE REVENUE***

The Sinsational Smile System features:

- ➢ The first and ONLY green-certified whitening system
- ➢ 1-minute prep time – whitening tray is PRELOADED
- ➢ Each preloaded tray contains a proprietary blend of 25% carbamide-peroxide whitening gel
- ➢ Gel contains organic menthol, which acts as a soft-tissue soother
- ➢ Utilizes an LED (non-UV) accelerator light to speed up process
- ➢ Each treatment includes a complimentary take-home whitening pen that is good for up to 60 applications
- ➢ Treatment can be performed by anyone in the office: physician is not required to perform a self-administered cosmetic treatment
- ➢ Requires no pretreatment gels or anesthetics

ROI Based on a $30 Cost with $129 Treatment Fee					
Procedures Per Week	**1**	**3**	**6**	**9**	**12**
Average Weekly Revenue	**$100**	**$300**	**$600**	**$630**	**$840**
Annual Practice Revenue	**$5.2K**	**$15.6K**	**$31.2K**	**$46.8K**	**$62.4K**

The complete **Sinsational Smile System** comes with enough consumables to perform 24 procedures. As modeled above, the original investment can paid off in just 17 treatments!

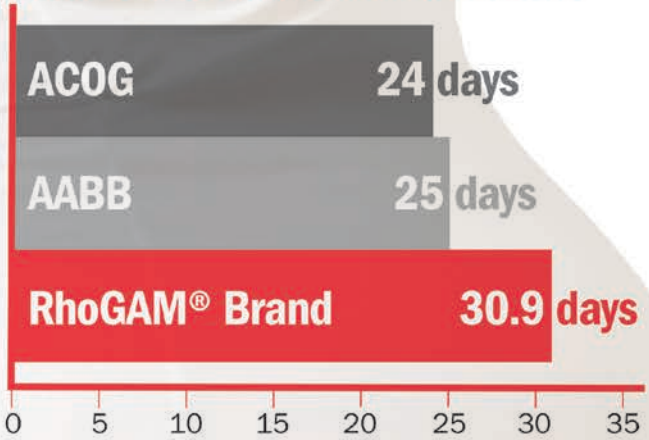
For Rh-negative patients

Protection that stands the test of time

RhoGAM® Brand aligns with ACOG and AABB recommendations[1,2,3]



This chart shows that the mean elimination half-life of RhoGAM® Brand exceeds the half-life on which the ACOG (American Congress of Obstetricians and Gynecologist) and AABB (American Association of Blood Banks) dosing guidelines were based.

During the critical prenatal time

- All Rh-negative expectant moms must be protected from Rh sensitization
- Risk of sensitization increases as pregnancy term progresses[1]
- The greater the half-life of an anti-D product, the more anti-D that is present at pregnancy term

Consider the importance of time

- RhoGAM® Brand has a mean elimination half-life of 30.9 days[3]
- ACOG dosing recommendations are based on a 24-day half-life[1]
- AABB dosing recommendations are based on a 25-day half-life[2]

RhoGAM®
Ultra-Filtered PLUS
Rh_0(D) Immune Globulin (Human)

Important Safety Information

RhoGAM® and MICRhoGAM® Ultra-Filtered PLUS Rho(D) Immune Globulin (Human) are made from human plasma. Since all plasma-derived products are made from human blood, they may carry a risk of transmitting infectious agents, e.g., viruses, and theoretically the Creutzfeldt-Jakob disease (CJD) agent. RhoGAM® and MICRhoGAM® are intended for maternal administration. Do not inject the newborn infant. Local adverse reactions may include redness, swelling, and mild pain at the site of injection and a small number of patients have noted a slight elevation in temperature. Patients should be observed for at least 20 minutes after administration. Hypersensitivity reactions include hives, generalized urticaria, tightness of the chest, wheezing, hypotension and anaphylaxis. RhoGAM® and MICRhoGAM® contain a small quantity of IgA and physicians must weigh the benefit against the potential risks of hypersensitivity reactions. Patients who receive RhoGAM® and MICRhoGAM® for Rh-incompatible transfusion should be monitored by clinical and laboratory means due to the risk of a hemolytic reaction.

Please see next page for Brief Summary of RhoGAM® Brand Prescribing Information. For Full Prescribing Information, visit www.RhoGAM.com

Rh_0(D) Immune Globulin (Human)

RhoGAM® Ultra-Filtered PLUS (300 µg) (1500 IU)

MICRhoGAM® Ultra-Filtered PLUS (50 µg) (250 IU)

Rx Only

For Intramuscular Injection Only

Prefilled syringes, preservative-free (thimerosal free), latex-free delivery system

INDICATIONS AND USAGE

Pregnancy and other obstetrical conditions

For administration to Rh-negative women not previously sensitized to the Rh_0(D) factor, unless the father or baby are conclusively Rh-negative.

- Delivery of an Rh-positive baby irrespective of the ABO groups of the mother and baby
- Antepartum prophylaxis at 26 to 28 weeks gestation
- Antepartum fetal-maternal hemorrhage (suspected or proven) as a result of placenta previa, amniocentesis, chorionic villus sampling, percutaneous umbilical blood sampling, other obstetrical manipulative procedure (e.g., version) or abdominal trauma
- Actual or threatened pregnancy loss at any stage of gestation
- Ectopic pregnancy

To maintain an adequate level of anti-D, RhoGAM should be administered every 12 weeks. If delivery of the baby does not occur 12 weeks after the administration of the standard antepartum dose (at 26 to 28 weeks), a second dose is recommended to maximize protection antepartum.

Transfusion of Rh-incompatible blood or blood products

- Prevention of Rh immunization in any Rh-negative person after incompatible transfusion of Rh-positive blood or blood products (e.g., red blood cells, platelet concentrates, granulocyte concentrates)

CONTRAINDICATIONS

- The use of RhoGAM and MICRhoGAM is contraindicated in Rh-positive individuals.

DOSAGE AND ADMINISTRATION

For intramuscular use only, do not administer intravenously.

Pregnancy and other obstetrical conditions

RhoGAM (300 µg) (1500 IU)
- Postpartum — if the newborn is Rh-positive. Administer within 72 hours of delivery.
- Antepartum —
  - –Prophylaxis at 26–28 weeks gestation.
  - –At or beyond thirteen weeks gestation: administer within 72 hours when suspected or proven exposure to Rh-positive red blood cells occurs resulting from invasive procedures, abdominal trauma or obstetrical manipulation, ectopic pregnancy, pregnancy termination or threatened termination.

Administer every 12 weeks starting from first injection to maintain a level of passively acquired anti-D. If delivery occurs within three weeks after the last antepartum dose, the postpartum dose may be withheld, but a test for fetal-maternal hemorrhage should be performed to determine if exposure to >15 mL of red blood cells has occurred.

MICRhoGAM (50 µg) (250 IU)

- Administer within 72 hours of actual or threatened termination of pregnancy (spontaneous or induced) up to and including 12 weeks gestation.

Transfusion of Rh-incompatible blood or blood products

Administer within 72 hours.

RhoGAM (300 µg) (1500 IU)
- 2.5–15.0 mL Rh-positive red blood cells
- >15.0 mL Rh-positive red blood cells (multiple syringes)

MICRhoGAM (50 µg) (250 IU)
- < 2.5 mL Rh-positive red blood cells

WARNINGS AND PRECAUTIONS

Warnings

- For intramuscular use only, do not inject intravenously.
- In the case of postpartum use, the product is intended for maternal administration.
- Do not inject the newborn infant.
- Patients should be observed for at least 20 minutes after administration.
- Administer with caution to patients who have had prior severe systemic allergic reactions to human immune globulin.
- RhoGAM / MICRhoGAM contain a small quantity of IgA. There is a potential risk of hypersensitivity in IgA deficient individuals.
- Patients treated for Rh-incompatible transfusion should be monitored by clinical and laboratory means for signs and symptoms of a hemolytic reaction.
- Store at 2 to 8°C. Do not store frozen.
- Do not use after the expiration date printed on the syringe.

Parenteral drug products should be inspected visually for particulate matter, discoloration and syringe damage prior to administration. Do not use if particulate matter and / or discoloration. The solution should appear clear or slightly opalescent.

Use of Plasma Derived Products

RhoGAM and MICRhoGAM are made from human plasma and may carry a risk of transmitting infectious agents, e.g., viruses, and theoretically the Creutzfeldt-Jakob disease (CJD) agent. The risk that such products will transmit an infectious agent has been reduced by screening plasma donors for prior exposure to certain viruses, by testing plasma for the presence of certain current virus infections and by using pathogen removal and inactivation techniques during the manufacturing process. All of the above steps are designed to increase product safety by reducing the risk of pathogen transmission.

Despite these measures, such products can still potentially transmit disease. There is also the possibility that unknown infectious agents may be present in such products. All infections thought by a physician possibly to have been transmitted by these products should be reported by the physician or other healthcare provider in the United States to Ortho-Clinical Diagnostics, Inc. at 1-800-421-3311. Outside the United States, the company distributing these products should be contacted. The physician should discuss the risks and benefits of these products with the patient.

ADVERSE REACTIONS

Adverse events (AE) after administration of RhoGAM and MICRhoGAM are rare.

The most frequently reported AEs are anti-D formation and injection site reactions, such as swelling, induration, redness and mild pain or warmth. Possible systemic reactions are skin rash, body aches or a slight elevation in temperature. Severe systemic allergic reactions are extremely rare. Patients should be observed for at least 20 minutes after administration. There have been no reported fatalities due to anaphylaxis or any other cause related to RhoGAM or MICRhoGAM administration.

As with any Rh_0(D) Immune Globulin (Human), administration to patients who are Rh-positive or have received Rh-positive red blood cells may result in signs and symptoms of a hemolytic reaction, including fever, back pain, nausea and vomiting, hypo- or hypertension, hemoglobinuria/emia, elevated bilirubin and creatinine and decreased haptoglobin.

RhoGAM and MICRhoGAM contain a small quantity of IgA (less than 15 µg per dose). Although high doses of intravenous immune globulin containing IgA at levels of 270-720 µg/mL have been given without incident during treatment of patients with high-titered antibodies to IgA, the attending physician must weigh the benefit against the potential risks of hypersensitivity reactions.

DRUG INTERACTIONS

Immune globulin preparations including Rh_0(D) Immune Globulin (Human) may impair the efficacy of live vaccines such as measles, mumps and varicella. Administration of live vaccines should generally be delayed until 12 weeks after the final dose of immune globulin. If an immune globulin is administered within 14 days after administration of a live vaccine, the immune response to the vaccination may be inhibited.

Because of the importance of rubella immunity among women of childbearing age, the postpartum vaccination of rubella-susceptible women with rubella or MMR vaccine should not be delayed because of the receipt of Rh_0(D) Immune Globulin (Human) during the last trimester of pregnancy or at delivery. Vaccination should occur immediately after delivery and if possible, testing should be performed after 3 or more months to ensure immunity to rubella and if necessary, to measles.

USE IN SPECIFIC POPULATIONS

Pregnancy Category C

Animal reproduction studies have not been conducted with RhoGAM or MICRhoGAM. The available evidence suggests that Rh_0(D) Immune Globulin (Human) does not harm the fetus or affect future pregnancies or the reproduction capacity of the maternal recipient.

Rh Blood Type

RhoGAM or MICRhoGAM Rho(D) Immune Globulin (Human) should only be administered to Rh-negative patients exposed or potentially exposed to Rh-positive red blood cells to prevent Rh immunization.

OVERDOSAGE

Repeated administration or increased dosage in Rh-negative individuals should not cause more severe or more frequent adverse reactions than the normal dose. Patients who receive RhoGAM or MICRhoGAM for Rh-incompatible transfusion should be monitored by clinical and laboratory means due to the risk of a hemolytic reaction.

DESCRIPTION

RhoGAM and MICRhoGAM Rh_0(D) Immune Globulin (Human) are sterile solutions containing immunoglobulin G (IgG) anti-D (anti-Rh) for use in preventing Rh immunization. They are manufactured from human plasma containing anti-D. A single dose of RhoGAM contains sufficient anti-D (300 µg or 1500 IU) to suppress the immune response to up to 15 mL of Rh-positive red blood cells. A single dose of MICRhoGAM contains sufficient anti-D (50 µg or 250 IU) to suppress the immune response to up to 2.5 mL of Rh-positive red blood cells.

The final product contains 5 ± 1% IgG, 2.9 mg/mL sodium chloride, 0.01% Polysorbate 80 (non-animal derived) and 15 mg/mL glycine. Small amounts of IgA, typically less than 15 µg per dose, are present. The pH range is 6.20–6.55 and IgG purity is ≥ 98%. The product contains no added human serum albumin (HSA), no thimerosal or other preservatives and utilizes a latex-free delivery system.

CLINICAL PHARMACOLOGY

RhoGAM and MICRhoGAM act by suppressing the immune response of Rh-negative individuals to Rh-positive red blood cells. The mechanism of action is unknown. RhoGAM, MICRhoGAM and other Rh_0(D) Immune Globulin (Human) products are not effective in altering the course or consequences of Rh immunization once it has occurred.

DxRx SOLUTIONS

Make one call or e-mail to our diagnostics, pharmaceutical, and vaccine experts and let us do the research.

Henry Schein's DxRx Hotline is a single point of contact for your organization for answers to various types of questions related to diagnostics, pharmaceuticals, and vaccines.

FEATURES:

- Latest updates on supply issues • Indications and usage as provided on package inserts • Brand-to-generic comparisons
- CPT® and J codes* • CLIA product status • Product storage requirements
- ACIP recommendations for vaccinations • Flu vaccine and flu-related topics

HENRY SCHEIN® DxRxSolutions™
DIAGNOSE • TREAT • PREVENT

BENEFITS:

- One phone call to answer pharmaceutical, diagnostic, and vaccination questions • Live support with no automation

*For informational purposes only. Source: www.ReimbursementCodes.com and/or www.cms.gov. Customer is responsible for verification of billing/coding in accordance with applicable specific circumstances.

SAMPLING PROGRAM

Increase patient compliance by up to 30%* providing onsite prescription samples.

HENRY SCHEIN Rx SAMPLES SERVICE

The Henry Schein Rx Samples Service is a free and secure online service that enables eligible practitioners to obtain medication samples easily and conveniently, with no expense to the practice.**

FEATURES:

- Electronic ordering process • Samples are shipped directly to your practice and arrive within 4–6 business days
- Simplify reorders by using the "Recurring Request" order feature

BENEFITS:

- Ease-of-use
- Provide onsite/same-day patient treatment
- Enhance patient satisfaction and compliance simply and effectively
- Valuable information about patient response to new therapies
- Complimentary service for Henry Schein customers
- No expense to the practice

**Studies show that 30% of patients fill a prescription only when provided a sample.*

***Only eligible prescribers are able to enroll and order samples through the Henry Schein Rx Samples Service.*

Getting started is easy. Activate your account and order samples immediately.
Go to www.hsrxss.com and click the "Check Eligibility & Register Now" button.

Welch Allyn

Connex® Integrated Wall System

Combines the advanced spot check and monitoring capabilities of the Welch Allyn Connex® Vital Signs Monitor with the Welch Allyn Integrated Diagnostic System (which includes an otoscope and ophthalmoscope), allowing clinicians to take and electronically capture accurate patient vital signs as well as perform basic diagnostic exams. This easy-to-use system features a large, intuitive, color touch-screen that can help with patient communications. Since the system is compact, wall-mounted, and comes with a cord management system, valuable floor space is saved and tangled, hanging cords are reduced. For connected facilities, patient vitals can be sent electronically, directly to an EMR/EHR system, reducing manual transcription errors and giving clinicians immediate access to accurate data—enhancing clinical decision-making and improving patient safety.

- Fast 15-second NIBP and pulse rate
- SureTemp Plus and/or Braun ThermoScan® PRO 4000 ear thermometry
- Masimo® or Nellcor® pulse oximetry
- Adult, pediatric, and neonatal blood pressure modes
- NIBP interval monitoring mode, including customizable interval programs
- Programmable visual and audible alarms for BP, SpO_2, temperature and pulse
- Integrated 3.5-V handles for physical assessment tools

Multiple configurations available:

IQspiro™ Digital Spirometry System

Combines a digital spirometer with innovative software solutions that make it fast and easy to capture, interpret, and retrieve patient information. This digital spirometer also features correct patient positioning that can optimize testing and an eject lever that saves time and alleviates handling of used mouthpieces.

- View real-time Flow/Volume Loop and Volume/Time graphs with fully customizable parameters
- Pre- and post-bronchodilator testing with automatic interpretation
- Eject lever alleviates handling of used mouthpiece
- Accurate and precise; meets or exceeds ATS 2005 Standards
- Lightweight, portable design weighs only 9 oz
- Correct, ergonomic patient testing orientation
- Easy-grasp, T-shaped-handle design for patient support and stability during testing
- Improved mouthpiece stability and protection with easy-latch door design
- Easy-to-print, full-page reports on standard paper

WelchAllyn®

Green Series™ 900 Procedure Light

This procedure light, featuring six LEDs, combines outstanding durability, extraordinary maneuverability, unparalleled spot quality and multiple mounting options. Whiter, brighter and greener: six white LEDs offer greater intensity. Touchless On/Off with dimming option. Multiple mounting options for floor space maximization. Disposable sheath available to help reduce the risk of infection due to cross-contamination. Rugged, ergonomic design allows for improved performance and long-lasting durability. Lower cost of ownership due to elimination of bulb replacement and lower energy consumption. 5-year limited warranty to include the LED light source and power supply only.

BURDICK

Burdick ELI™ 280 Touchscreen Electrocardiograph

Compact and lightweight, the ELI™ 280 electrocardiograph provides comprehensive functionality in a portable, touchscreen device. The easy-to-use ELI 280 is designed to meet the demands of high-volume ECG environments. 10⅒" high-resolution color LCD, with convenient touchscreen, displays up to 12 leads of ECG data for immediate review and plotting. Widely recognized Mortara resting-ECG interpretation algorithm uses gender-specific and adult and pediatric criteria to provide a silent second opinion for resting ECG interpretation. ELI 280 offers a choice of either the innovative WAM™ wireless acquisition module or the AM12™ acquisition module. Both include replaceable lead wires, lead fail indicator, and remote control with buttons for ECG acquisition and rhythm printing. ELI 280 incorporates Mortara's unique Best 10 feature, which automatically selects and displays the best 10 seconds of ECG from memory, reducing the need for repeat ECGs caused by patient movement or other sources of ECG artifact. ELI 280 easily integrates with cardiology management systems for increased efficiency and optimized workflow. With automatic time sync and the ability to obtain orders and reports with a single touch, the ELI 280 can save user time and effort. Experience the benefits of bidirectional communication via internal modem, LAN, or wireless LAN with Mortara's E-Scribe™, as well as third-party PACS systems via XML, PDF, UNIPRO32, and DICOM®.

Assurance 50® "Fade-Resistant" Papers

Single Channel, Red Grid

Unique line of thermal recording media. Look and feel is similar to standard thermal charts, but difference is in acid-free base paper and patented chemical thermal coatings. Combination of these 2 elements works to deliver 50 years of ECG image life without worry or fading. Thermal chart contaminants such as UV light, PVC, alcohol, adhesive tape, and electrode creams are no longer of concern. No special care or handling is required. Guarantee clear, indelible original records, year after year.

With 3 ways to activate and a broader range of sizes than most other brands, SurGuard®3 is the industry's most adaptable safety needle. Add separate thumb and finger grips, unequalled sharpness,* and competitive pricing, and you'll understand why we say SurGuard®3 is the one needle that fits *every* clinician's style.

Plus, SurGuard®3 has the sharpest needles among major brands tested.*

- 10% sharper than similar needles from other leading brands
- More comfortable injections for patients

Bottom line: No matter what you're looking for in a needle, you're looking for SurGuard®3.

Prepare to Take Care During Cold & Flu Season

Featuring Kleenex® America's #1 at-home brand

With a brand this powerful, it's no wonder why so many people use the word "Kleenex®" when referring to any brand of facial tissue. This Cold & Flu season show you care with the brand customers know and trust.

- Helps you reduce the spread of germs to help improve staff and patient wellness.
- Promotes your commitment to a healthy office environment.
- Customers who purchase specified products will receive a FREE Communication Tool Kit. The kit includes posters, door clings and tent cards to reinforce the positive image of your practice.

Manuka Honey....

The Natural choice for wound management

Advancis Medical
Improving the outcomes of patient care

100% Medical Grade Manuka honey is a completely natural substance, providing a combination of beneficial wound healing effects not found in other types of dressings. Manuka honey is a wound filler/topical dressing that will assit in autolytic debridement and de-sloughing, eliminate odors, and provide a moist wound healing environment. It is also anti-inflammatory, has an osmotic effect, drawing harmful tissue away from the wound bed, and can be used in pain management. Manuka Honey is a completely natural substance and can be washed away using normal saline solution.

Areas of Use:

- Granulating or shallow wounds
- Autolytic debriding or de-sloughing small areas of necrotic or sloughy tissue
- Pressure ulcers, leg ulcers, diabetic ulcers
- Surgical wounds, infected wounds, cavity wounds and sinuses
- Burns and graft sites

Activon® Tube
100% Medical-Grade Manuka Honey
0.9-oz Tube

3.9" x 3.9"
(852-0040) 5/box

Activon® Tulle Ribbon
Mesh Ribbon with 100% Medical-Grade Manuka Honey

- Ribbon is very soft and conformable
- Anatomically shaped to fit easily and effectively within cavities and sinuses
- Wounds can be easily packed for direct contact with the entire wound site
- 3D structure to deliver more honey to the wound site
- Osmotic effect, drawing harmful tissue away from the wound bed

1" x 11.8"
(852-0083) 5/box

COVIDIEN
positive results for life

Telfa™ Ouchless Non-Adherent Pads
Absorbent pads are ideal as primary dressings for lightly-draining wounds. Minimize wound trauma: they won't disrupt healing tissue by sticking to wound.

- Bonded on both sides with perforated, nonadhering film, so it can be cut to fit any shape without separating
- Polyester wound-contact-film polymer can be steam sterilized
- Core made from 100% cotton
- Easy to use, so they are a perfect take-home dressing
